Cascadia Daily GNSS Time Series Denoising: Graph Neural Network and Stack Filtering: Supplementary material

| | University Nevada Reno | | | | | |
|--------------|------------------------|-------|----------|------------------|-------|----------|
| | Average offset mm | | | Max offset in mm | | |
| Dataset | East | North | Vertical | East | North | Vertical |
| UNR original | 1.083 | 1.029 | 3.259 | 4.869 | 4.631 | 14.237 |
| GNN | 0.283 | 0.271 | 0.81 | 1.437 | 1.456 | 4.673 |
| Wdowinski | 0 | 0 | 0 | 0 | 0 | 0 |
| Tremor stack | 0.025 | 0.022 | 0.149 | 0.255 | 0.16 | 0.627 |
| 400km stack | 0.05 | 0.031 | 0.149 | 0.262 | 0.162 | 0.775 |

Table 1: University Nevada Reno absolute network offset in mm for all the different denoising techniques.

| | University Nevada Reno | | | | | |
|--------------|----------------------------|-------|----------|------------|-------|----------|
| | Average offset reduction % | | | Max offset | | |
| Dataset | East | North | Vertical | East | North | Vertical |
| GNN | 74% | 74% | 75% | 70% | 69% | 67% |
| Wdowinski | 100% | 100% | 100% | 100% | 100% | 100% |
| Tremor stack | 98% | 98% | 95% | 95% | 97% | 96% |
| 400km stack | 95% | 97% | 95% | 95% | 97% | 95% |

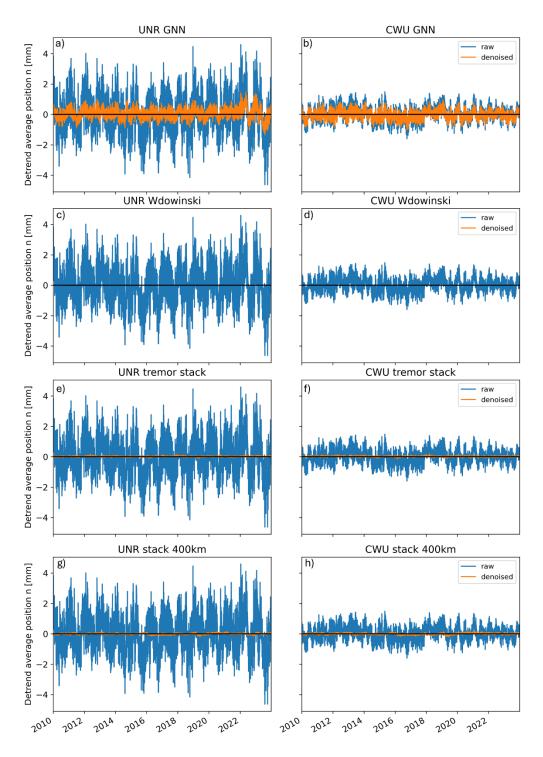

Table 2: University Nevada Reno relative network offset reduction in % of original dataset for all the different denoising techniques.

| | Central Washington University | | | | | |
|--------------|-------------------------------|-------|----------|------------------|-------|----------|
| | Average offset mm | | | Max offset in mm | | |
| Dataset | East | North | Vertical | East | North | Vertical |
| CWU original | 0.364 | 0.366 | 4.233 | 1.641 | 1.601 | 21.822 |
| GNN | 0.256 | 0.231 | 1.219 | 1.039 | 1.01 | 6.298 |
| Wdowinski | 0 | 0 | 0 | 0 | 0 | 0 |
| Tremor stack | 0.027 | 0.024 | 0.324 | 0.261 | 0.155 | 1.142 |
| 400km stack | 0.056 | 0.037 | 0.183 | 0.239 | 0.186 | 0.747 |

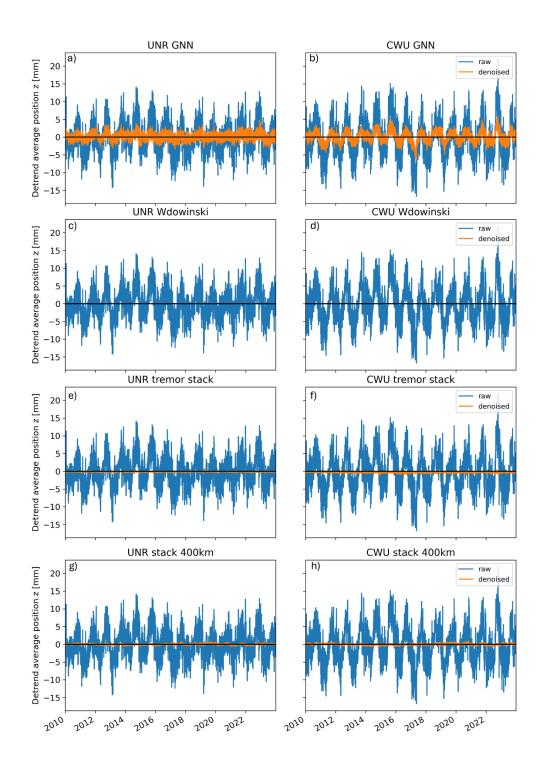

Table 3: Central Washington University absolute network offset in mm for all the different denoising techniques.

| | Central Washington University | | | | | |
|--------------|-------------------------------|-------|----------|------------|-------|----------|
| | Average offset reduction % | | | Max offset | | |
| Dataset | East | North | Vertical | East | North | Vertical |
| GNN | 30% | 37% | 71% | 37% | 37% | 71% |
| Wdowinski | 100% | 100% | 100% | 100% | 100% | 100% |
| Tremor stack | 93% | 93% | 92% | 84% | 90% | 95% |
| 400km stack | 85% | 90% | 96% | 85% | 88% | 97% |

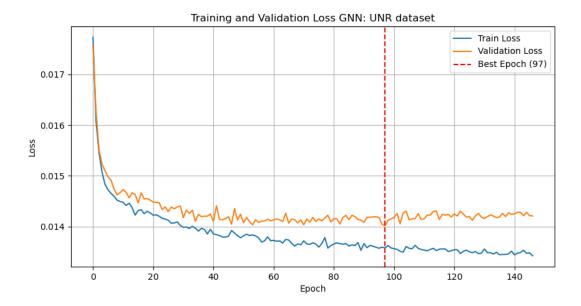

Table 4: Central Washington University relative network offset reduction in % of original dataset for all the different denoising techniques.

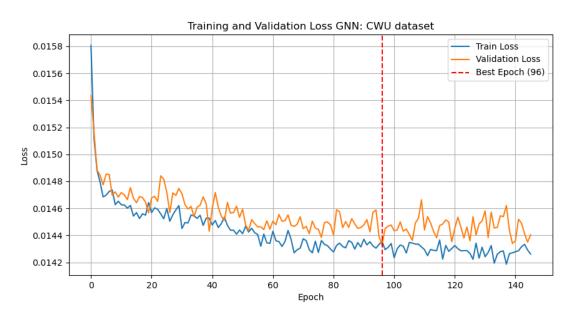

S1: Time series of the average detrended position of the network on the north component only for the UNR dataset on the left, and the CWU on the right. Each row is a different denoising process. The raw data is shown in blue and the denoised data is shown in orange.

S2: Time series of the average detrended position of the network on the vertical component only for the UNR dataset on the left, and the CWU on the right. Each row is a different denoising process. The raw data is shown in blue and the denoised data is shown in orange.

S3: Training loss curves for train data and validation data on the UNR dataset. The red dash line shows the best validation loss. The weights of the model are restored to that checkpoint.

S4: Training loss curves for train data and validation data on the CWU dataset. The red dash line shows the best validation loss. The weights of the model are restored to that checkpoint.
