

[Click here to download a PDF of this checklist](#)

Requirements at submission:

- PDF format
- 12 pt font, line numbers, and double spacing
- Manuscript under 10,000 words (unless you have talked to an editor)
- Maximum 10 figures in the manuscript (excluding supplementary material)
- Place figures within text, not at the end of the document
- Relevant data, code, and samples cited in the manuscript and/or in the [Data and Code Availability Statement](#)
- Spell-check and proofread your manuscript
- **Required sections/components:**
 - Abstract in English (max 200 words)
 - [Author contributions statement](#) using [CRediT taxonomy](#)
 - [Data and Code Availability statement](#)
 - [Competing Interests statement](#)
 - [ORCID](#) for corresponding author (preferably for all authors)
 - Reference list with all works cited in the paper, using [APA citation format](#) with full author lists. DOIs should be provided for all references that have them. No excess references that are not cited in the paper.
- Ensure that you have copyright permissions for the use of any 3rd-party materials in the manuscript
- Suggest potential reviewers during submission in “comments to the editor”
- Submit your article as [the appropriate type](#) (research article, fast report, other report, etc)
- [All authors must have agreed on manuscript contents](#), including the author list and contributions statement
- Your submission should not have been previously published or be under consideration at another journal. [Preprints on public servers are ok](#); please provide the preprint DOI in “comments to the editor”

Requirements after acceptance:

- Format manuscript using a [Seismica template](#) (supplementary material does not need to be in a template because it will not be typeset)
- Each figure must be a png at publication resolution (300+ dpi)
- Figures with multiple parts/panels must be incorporated into exactly one file per figure
- Figures sized for either 1- or 2-column width (86 mm or 180 mm wide), maximum height 200 mm.

Strong suggestions:

- Place tables in supplementary materials rather than in text
- Format using the Seismica LaTeX template
- Use perceptually-uniform, color-vision-deficiency (CVD) friendly colormaps in figures (see: [Fabio Crameri's colormaps](#), [coblis tool for checking figures](#))
- Include a plain-language summary (max 200 words)
- Include up to two translations of the abstract into additional languages
